

# INTRO TO REGIONAL PLANNING 2ED PB (Built Environment)

Now reissued with completely updated appendices, *An introduction to regional planning* has established itself as a central basic text for students of urban and regional planning, geography and economics. John Glasston's revision takes into account not only changes which have already occurred, but also issues which will become important over the next few years. He has introduced new material on developments in regional planning concepts and theories; topics not covered by the first edition are now included, such as the role of multi-national firms, transport factors and socio-political factors in regional development. All statistics have been updated, and several new maps are included. This text is part of a series on environmental planning for use in undergraduate and postgraduate planning courses and for those involved in all aspects of the planning process.

Green Artists League GALvanizing Eco-Responsibility Subscribe via RSS HOME ABOUT ALCHEMICAL GARDEN ECOVENTIONS Help Cultivate The Alchemical Garden: An Edible Garden and Art Park at Newburyport's Rail Trail Posted by erin on April 25, 2011 3 comments The Alchemical Garden site February 2010 GAL is turning a desolate field of weeds into a visually compelling garden that will educate and engage the community for years to come. Located on a 160 x 25 site near the south entrance of Newburyport's Clipper City Rail Trail, the Alchemical Garden is a richly layered evolving art and horticulture experience that is accessible on many different levels to the public. Alchemical Garden Plot plan Alchemical Garden is designed to become a model for a sustainable, interactive public garden through the use of symbiotic, low maintenance plantings and recycled materials. The ancient discipline of Alchemy marries art and science and is famously known for transforming a common material into gold. The Alchemical Garden will lead the community to transform on a number of levels : Alchemical Garden with Spring Wheat "Crop Circles" June, 2011 BUILD COMMUNITY: The Garden creates a gathering space for individuals to form a more intimate relationship with their community. The space is designed with visual features and seating areas to compel passers-by to pause, reflect, and have a multi-sensory interactive experience ( sight, smell, touch, taste, smell) with the garden and the community.
