

Public Deficits: A Comparative Study of their Economic and Political Consequences in Britain, Canada, Germany & the US (Perspectives In Comparative Politics)

Public Deficits are one of the most pressing problems in all advanced industrialised countries. Public indebtedness has reached proportions which threaten selected government policies and even challenge the governability of democracies. This important new book focuses on four G-7 countries: Britain, Canada, Germany and the United States. These countries have different economic traditions, institutions and budgetary procedures and have developed different approaches to the problem of public deficits. Through a unique comparative approach the authors reach the core of the deficit problem and what it means for governments in democratic societies. Before providing a specific analysis they ask: * What is public debt, and what is the theoretical background for the analysis of the deficit problem? * What are the political and social consequences of budgetary deficits, and are there any restrictions for the management of budgets in this era of economic globalisation and regionalisation? A detailed study follows, of the experience of Britain, Canada, Germany and the United States. Consideration of the same issues in each help the comparison: the history of the deficit problem; the institutional framework for decisions on the deficit; the importance of the debt problem in the national political and economic discourse; and the effects of deficit control policies. The concluding chapter is an in-depth comparison of the four countries and puts the problem of public deficits into a political science perspective.

Green Artists League GALvanizing Eco-Responsibility Subscribe via RSS HOME ABOUT ALCHEMICAL GARDEN ECOVENTIONS Help Cultivate The Alchemical Garden: An Edible Garden and Art Park at Newburyport's Rail Trail Posted by erin on April 25, 2011 3 comments The Alchemical Garden site February 2010 GAL is turning a desolate field of weeds into a visually compelling garden that will educate and engage the community for years to come. Located on a 160 x 25 site near the south entrance of Newburyports Clipper City Rail Trail, the Alchemical Garden is a richly layered evolving art and horticulture experience that is accessible on many different levels to the public. Alchemical Garden Plot plan Alchemical Garden is designed to become a model for a sustainable, interactive

public garden through the use of symbiotic, low maintenance plantings and recycled materials. The ancient discipline of Alchemy marries art and science and is famously known for transforming a common material into gold. The Alchemical Garden will lead the community to transform on a number of levels : Alchemical Garden with Spring Wheat "Crop Circles" June, 2011 BUILD COMMUNITY: The Garden creates a gathering space for individuals to form a more intimate relationship with their community. The space is designed with visual features and seating areas to compel passers-by to pause, reflect, and have a multi-sensory interactive experience (sight, smell, touch, taste, smell) with the garden and the community.
