

Behind the Zipper

J'Toya Nelson explored the minds of male friends to get their interpretations of sex and relationships. She was surprised to find that the men were picky and concerned about who got behind their zippers because of their past actions and the way they view most women. They shared their first and worst sexual experiences and admitted that settling down was difficult for some of them because they couldn't see the forest for the trees. Fortunately, a serious wake up call about community activities saved some of them from self-destruction. The men told colorful stories that not only entertained but expressed the hurt and disappointment they felt when faced with deceit and rejection. They pointed out that there were just as many women determined to get behind their zippers as they were determined to get under their skirts. The raw and straightforward language in this book was the only way to truly express their opinions of the phrase, Behind the Zipper.
