

Building Engines for Growth and Competitiveness in China: Experience with Special Economic Zones and Industrial Clusters (Directions in Development)

In the past 30 years, China has achieved an unprecedented development miracle in human history. How did China achieve this? What are the key drivers for such a rapid growth? And most importantly, what can be learned from China's success? While many factors could be identified to explain China's success, it is no doubt that the numerous Special Economic Zones (SEZs) and industrial clusters that emerged after the country's reforms are two important engines that have been driving China's rapid development. The key experiences of China's SEZs and industrial clusters could be best summarized as: gradualism with experimental approach; strong commitment; and an active facilitating state with strong pragmatism. This book reviews the development experiences of China's SEZs and industrial clusters through extensive research, field visits, and case studies in an attempt to benefit the policy-makers, development practitioners, scholars from developing countries, and the global development community in general. It contains five detailed case studies: three SEZs in the broadest sense (Shenzhen, Tianjin and Kunshan) and two industrial clusters (Wenzhou footwear cluster in Zhejiang and Xiqiao textile cluster in Guangdong). This volume represents the most comprehensive volume to date on China's experiences with both its SEZ and cluster experiences.

Green Artists League GALvanizing Eco-Responsibility Subscribe via RSS HOME ABOUT ALCHEMICAL GARDEN ECOVENTIONS Help Cultivate The Alchemical Garden: An Edible Garden and Art Park at Newburyport's Rail Trail Posted by erin on April 25, 2011 3 comments The Alchemical Garden site February 2010 GAL is turning a desolate field of weeds into a visually compelling garden that will educate and engage the community for years to come. Located on a 160 x 25 site near the south entrance of Newburyport's Clipper City Rail Trail, the Alchemical Garden is a richly layered evolving art and horticulture experience that is accessible on many different levels to the public. Alchemical Garden Plot plan Alchemical Garden is designed to become a model for a sustainable, interactive public garden through the use of symbiotic, low maintenance plantings and recycled materials. The ancient discipline of Alchemy marries art and science and is famously known for transforming a common material into gold. The Alchemical Garden will lead the community to transform on a number of levels: Alchemical Garden with Spring Wheat "Crop Circles" June, 2011 BUILD COMMUNITY: The Garden creates a gathering space for individuals to form a more intimate relationship with their community. The space is designed with visual features and seating areas to

Building Engines for Growth and Competitiveness in China: Experience with Special Economic Zones and Industrial Clusters (Directions in Development) compel passers-by to pause, reflect, and have a multi-sensory interactive experience (sight, smell, touch, taste, smell) with the garden and the community.
