

Social Inequality: Values, Growth, and the State (Development and Inequality in the Market Economy)

Inequality of income, wealth, and opportunities is an ancient concern of economists, philosophers, political leaders, and the community at large. Is inequality the unavoidable dark side of capitalism? Is it the price to be paid for fostering wealth creation and material progress? Can economic growth and social equity coexist? Is inequality an ethical or moral problem? An economic problem? A political one? Leading international scholars endeavor here to answer these key questions. The volume treats the problem of income distribution from three angles. First, it reviews the recent literature on distributive justice both from the viewpoint of philosophers (Rawls, Dworkin, Nozick, Cohen) and economists (Sen, Roemer, and others), in order to clarify issues, approaches, and conclusions derived from work done in the interface between philosophy and economics. Second, it analyzes the issue of inequality from the viewpoint of its impact on (and interactions with) economic performance, particularly on the rate of economic growth, the level of savings and investment, and the degree of macro and social stability. And third, it examines the effect of redistributive policies--aimed to reduce inequality--in the size of the state and the accountability of government. The essays in the book provide a thorough analysis of existing conceptual frameworks, highlighting new areas for future analysis and identifying open questions on the subject with empirical analysis of actual country experiences. It will be invaluable to economists, students, and others concerned with issues of equality. Andres Solimano is Director of the Country Management Unit for Colombia, Ecuador, and Venezuela at the World Bank.

desolate field of weeds into a visually compelling garden that will educate and engage the community for years to come. Located on a 160 x 25 site near the south entrance of Newburyports Clipper City Rail Trail, the Alchemical Garden is a richly layered evolving art and horticulture experience that is accessible on many different levels to the public. Alchemical Garden Plot plan Alchemical Garden is designed to become a model for a sustainable, interactive public garden through the use of symbiotic, low maintenance plantings and recycled materials. The ancient discipline of Alchemy marries art and science and is famously known for transforming a common material into gold. The Alchemical Garden will lead the community to transform on a number of levels : Alchemical Garden with Spring Wheat "Crop Circles" June, 2011 BUILD COMMUNITY: The Garden creates a gathering space for individuals to form a more intimate relationship with their community. The space is designed with visual features and seating areas to compel passers-by to pause, reflect, and have a multi-sensory interactive experience (sight, smell, touch, taste, smell) with the garden and the community.
