

The End of Overeating: Taking Control of the Insatiable American Appetite

Most of us know what it feels like to fall under the spell of food when one slice of pizza turns into half a pie, or a handful of chips leads to an empty bag. But it's harder to understand why we can't seem to stop eating even when we know better. When we want so badly to say no; why do we continue to reach for food? Dr. David Kessler, the dynamic former FDA commissioner who reinvented the food label and tackled the tobacco industry, now reveals how the food industry has hijacked the brains of millions of Americans. The result? America's number-one public health issue. Dr. Kessler cracks the code of overeating by explaining how our bodies and minds are changed when we consume foods that contain sugar, fat, and salt. Food manufacturers create products by manipulating these ingredients to stimulate our appetites, setting in motion a cycle of desire and consumption that ends with a nation of overeaters. The End of Overeating explains for the first time why it is exceptionally difficult to resist certain foods and why it's so easy to overindulge. Dr. Kessler met with top scientists, physicians, and food industry insiders. The End of Overeating uncovers the shocking facts about how we lost control over our eating habits and how we can get it back. Dr. Kessler presents groundbreaking research, along with what is sure to be a controversial view inside the industry that continues to feed a nation of overeaters from popular brand manufacturers to advertisers, chain restaurants, and fast food franchises. For the millions of people struggling with weight as well as for those of us who simply don't understand why we can't seem to stop eating our favorite foods, Dr. Kessler's cutting-edge investigation offers new insights and helpful tools to help us find a solution. There has never been a more thorough, compelling, or in-depth analysis of why we eat the way we do.

Green Artists League GALvanizing Eco-Responsibility Subscribe via RSS HOME ABOUT ALCHEMICAL GARDEN ECOVENTIONS Help Cultivate The Alchemical Garden: An Edible Garden and Art Park at Newburyport's Rail Trail Posted by erin on April 25, 2011 3 comments The Alchemical Garden site February 2010 GAL is turning a desolate field of weeds into a visually compelling garden that will educate and engage the community for years to come. Located on a 160 x 25 site near the south entrance of Newburyports Clipper City Rail Trail, the Alchemical Garden is a richly layered evolving art and horticulture experience that is accessible on many different levels to the public. Alchemical Garden Plot plan Alchemical Garden is designed to become a model for a sustainable, interactive public garden through the use of symbiotic, low maintenance plantings and recycled materials. The ancient discipline of Alchemy marries art and science and is famously known for transforming a common material into gold. The Alchemical Garden will lead the community to transform on a number of levels : Alchemical Garden with Spring Wheat "Crop Circles" June, 2011 BUILD COMMUNITY: The Garden creates a gathering space for individuals to form a more intimate relationship with their community. The space is designed with visual features and seating areas to compel passers-by to pause, reflect, and have a multi-sensory interactive experience (sight, smell, touch, taste, smell) with the garden and the community.
