

Strategy and Innovation in Japanese Business

Japanese firms once led the world in fields such as electronics and robotics. Japanese products were renowned for their reliability and quality - a success based on systematic refinement of production processes and technological enhancement of existing products. Now Japans economy is sluggish, and many Japanese firms are struggling. Faced with economic difficulties, Japanese managers have sought to bypass the research and development process and revisit the exhausted sources of past success. This is not a sustainable solution for the individual firms or for the economy as a whole. Japanese firms will not find success in continuing to imitate other firms product concepts. This book discusses how the future for Japanese firms lies in strategy and innovation. The future success of Japanese firms will be based on new products and new concepts, and developing these will require improved communications networks in research and development, strategic innovation and integration, concept-oriented innovation, and a strong management-driven approach to research and development.

Green Artists League GALvanizing Eco-Responsibility Subscribe via RSS HOME ABOUT ALCHEMICAL GARDEN ECOVENTIONS Help Cultivate The Alchemical Garden: An Edible Garden and Art Park at Newburyport's Rail Trail Posted by erin on April 25, 2011 3 comments The Alchemical Garden site February 2010 GAL is turning a desolate field of weeds into a visually compelling garden that will educate and engage the community for years to come. Located on a 160 x 25 site near the south entrance of Newburyports Clipper City Rail Trail, the Alchemical Garden is a richly layered evolving art and horticulture experience that is accessible on many different levels to the public. Alchemical Garden Plot plan Alchemical Garden is designed to become a model for a sustainable, interactive public garden through the use of symbiotic, low maintenance plantings and recycled materials. The ancient discipline of Alchemy marries art and science and is famously known for transforming a common material into gold. The Alchemical Garden will lead the community to transform on a number of levels : Alchemical Garden with Spring Wheat "Crop Circles" June, 2011 BUILD COMMUNITY: The Garden creates a gathering space for individuals to form a more intimate relationship with their community. The space is designed with visual features and seating areas to compel passers-by to pause, reflect, and have a multi-sensory interactive experience (sight, smell, touch, taste, smell) with the garden and the community.
