

Saving American Manufacturing

SAVING AMERICAN MANUFACTURING is the book that reveals the secrets of some of the most progressive and successful small manufacturing, companies in America and how they did it. Mike Collins knows all of these companies very well but, more importantly, he knows why they have been successful while other American manufacturers are struggling. All of these progressive manufacturers have many factors in common. But, the most important factors appear to be that they have an uncanny ability to-Monitor their customers and know what they want in the future.-Find and exploit new market niches -Consistently develop new products and services -Provide the best after sales service in their markets. Collins continues to travel the United States as a Johnny Appleseed of Manufacturing. He wants to find more of the new breed of manufacturers and offer their examples to other manufacturers that think they cannot compete. . His message is that there are emerging opportunities in the new economy and we can compete- but not as we competed in the past. He is now on a mission to share his message with SMMs from coast to coast. Michael Collins is a leading spokesman for small and midsize manufacturers (SMMS), but is a maverick in terms of traditional manufacturing philosophy. He doesn't believe that optimizing internal operations and continuing to lower costs will be enough to halt the decline of American Manufacturing or compete. From his own experience in turning around manufacturing companies and what he has learned from successful manufacturers, he feels it will be necessary to change the company to a Prospector organization that is designed to find and exploit new markets and emerging opportunities.

ECOVENTIONS Help Cultivate The Alchemical Garden: An Edible Garden and Art Park at Newburyport's Rail Trail Posted by erin on April 25, 2011 3 comments The Alchemical Garden site February 2010 GAL is turning a desolate field of weeds into a visually compelling garden that will educate and engage the community for years to come. Located on a 160 x 25 site near the south entrance of Newburyports Clipper City Rail Trail, the Alchemical Garden is a richly layered evolving art and horticulture experience that is accessible on many different levels to the public. Alchemical Garden Plot plan Alchemical Garden is designed to become a model for a sustainable, interactive public garden through the use of symbiotic, low maintenance plantings and recycled materials. The ancient discipline of Alchemy marries art and science and is famously known for transforming a common material into gold. The Alchemical Garden will lead the community to transform on a number of levels : Alchemical Garden with Spring Wheat "Crop Circles" June, 2011 BUILD COMMUNITY: The Garden creates a gathering space for individuals to form a more intimate relationship with their community. The space is designed with visual features and seating areas to compel passers-by to pause, reflect, and have a multi-sensory interactive experience (sight, smell, touch, taste, smell) with the garden and the community.
