Swiss effectiveness on the recovery and resolution of globally active banks! The Swiss Financial Market Supervisory Authority (FINMA) has published a great position paper. We learn about their single point of entry (SPE) approach (resolution led centrally by the home supervisory and resolution authority and focused on the top-level group company). Creditors of the parent bank or top-level holding company bear a share of the losses, allowing the entire financial group to be recapitalised. This recapitalisation must be sufficient to meet the needs of all group companies in Switzerland and abroad. This buys time with regard to restructuring the affected banks so that they can return to viable operation. The fall-back option is a break-up of the group which may include a sale of entities and business lines or a wind-down of the non-viable parts of the group while the systemically important functions are preserved. The recent entry into force of comprehensive legislation to mitigate the too big to fail problem in Switzerland has been well-publicised. The new law provides the legal basis for the measures FINMA may have to take in resolution proceedings. This position paper also addresses a variety of issues faced in implementing this strategy in the national and international context. FINMA and other regulatory authorities are currently working on resolution strategies and resolution plans for the Swiss G-SIBs. This position paper sets forth the actual status of these efforts. Read more at Number 6 below. Next, Jaime Caruana speaks about sovereign risk, and how to continue to turn a stone into bread. The Latin root of credit is credere, the infinitive form of credo. John Maynard Keynes described credit in 1943 as the miracle . . . of turning a stone into bread. And credit can indeed do great things, whether extended to sovereigns or to the private sector. Recently, however, there has been too much of a good thing,

contributing to a signal increase in systemic risk. As noted by the BIS Annual Report last June, the pool of top-rated sovereign debt within the OECD has diminished considerably over the past few years and it has also become more concentrated by issuer. Also, risk managers at banks and insurance companies are starting to attach non-zero probabilities of default to even the most creditworthy of sovereigns. We used to live in a world where sovereign risk was so low that investors could behave as if that debt was risk-free. The situation was a bit like air travel: we all know that the risks are not zero when we get on a plane but they are low enough for most of us to behave as if they were truly minimal. Read more at Number 1 below. Welcome to the Top 10 list.

Green Artists League GALvanizing Eco-Responsibility Subscribe via RSS HOME ABOUT ALCHEMICAL GARDEN ECOVENTIONS Help Cultivate The Alchemical Garden: An Edible Garden and Art Park at Newburyport's Rail Trail Posted by erin on April 25, 2011 3 comments The Alchemical Garden site February 2010 GAL is turning a desolate field of weeds into a visually compelling garden that will educate and engage the community for years to come. Located on a 160 x 25 site near the south entrance of Newburyport's Clipper City Rail Trail, the Alchemical Garden is a richly layered evolving art and horticulture experience that is accessible on many different levels to the public. Alchemical Garden Plot plan Alchemical Garden is designed to become a model for a sustainable, interactive public garden through the use of symbiotic, low maintenance plantings and recycled materials. The ancient discipline of Alchemy marries art and science and is famously known for transforming a common material into gold. The Alchemical Garden will lead the community to transform on a number of levels : Alchemical Garden with Spring Wheat "Crop Circles" June, 2011 BUILD COMMUNITY: The Garden creates a gathering space for individuals to form a more intimate relationship with their community. The space is designed with visual features and seating areas to compel passers-by to pause, reflect, and have a multi-sensory interactive experience (sight, smell, touch, taste, smell) with the garden and the community.
