

The Weir Group: The History of a Scottish Engineering Legend

In 1871 two brothers, George and James Weir, founded the engineering firm of G. & J. Weir, joining the booming range of industry on the west coast of Scotland. At their Cathcart works in Glasgow, the Weirs produced their own groundbreaking inventions. The most notable of these was the celebrated direct-acting feed pump, but all were crucial to the development of steam ships at that time. Today, more than 140 turbulent years later, the Weir Group is almost the last of those once-flourishing companies still to retain its independence and a Scottish base. Over the intervening century, Weirs manufactured pumps and valves for ships engines around the world, oil pipelines and desalination plants, armaments (in the two world wars) and heavy equipment for power stations. Along the way it was also involved in other activities, including the development of the autogiro (the precursor of the helicopter) and prefabricated housing. Rooted in the inventiveness and determination of the Victorian manufacturing age, Weirs adapted to a changing world, determined always to diversify, win overseas contracts, build partnerships and above all survive. Now, as Lord Smith of Kelvin retires after more than ten years as chairman and passes an impressive legacy - further strengthened by major recent acquisitions - to his successor, Charles Berry, the Weir Group once again has success firmly in its grasp. This fascinating story is told by William Weir, a past chairman and chief executive of the company. Combining personal reminiscence and colourful anecdote with cool analysis of the company's triumphs and occasional failures, this is an unusual company history and an invaluable record of a Scottish engineering legend.

Green Artists League GALvanizing Eco-Responsibility Subscribe via RSS HOME ABOUT ALCHEMICAL GARDEN ECOVENTIONS Help Cultivate The Alchemical Garden: An Edible Garden and Art Park at Newburyportâ€™s Rail Trail Posted by erin on April 25, 2011 3 comments The Alchemical Garden site February 2010 GAL is turning a

desolate field of weeds into a visually compelling garden that will educate and engage the community for years to come. Located on a 160 x 25 site near the south entrance of Newburyports Clipper City Rail Trail, the Alchemical Garden is a richly layered evolving art and horticulture experience that is accessible on many different levels to the public. Alchemical Garden Plot plan Alchemical Garden is designed to become a model for a sustainable, interactive public garden through the use of symbiotic, low maintenance plantings and recycled materials. The ancient discipline of Alchemy marries art and science and is famously known for transforming a common material into gold. The Alchemical Garden will lead the community to transform on a number of levels : Alchemical Garden with Spring Wheat "Crop Circles" June, 2011 BUILD COMMUNITY: The Garden creates a gathering space for individuals to form a more intimate relationship with their community. The space is designed with visual features and seating areas to compel passers-by to pause, reflect, and have a multi-sensory interactive experience (sight, smell, touch, taste, smell) with the garden and the community.
