

Implementing Standardized Work: Measuring Operators Performance (One-Day Expert)

This book, the first in The One-Day Expert series dedicated to Standardized Work, is about operator performance measurement. Implementing Standardized Work: Measuring Operators Performance explains how to measure the performance of operators quickly and simply without sacrificing accuracy. Detailing how to identify the most efficient operators and how to monitor their improvement over time, it describes a method that has been applied with success for years in the automotive industry. Grounded in one of the basic laws of factory physics—mastery of variability—this method can be automated very easily and thereby requires no labor consumption. In this episode of The One-Day Expert, Thomas, a plant director in an industrial group, is reassigned to another plant that is losing money. Morale in the plant is very low and the staff is pessimistic about the plant's future and is distrustful of senior management. Thomas's urgent mission is to turn the plant around. Previous plant managers have tried several initiatives with limited results. To face these challenges, Thomas has decided to use Standardized Work deployment to achieve quick and visible results while rebuilding a real team. This book recounts these initial steps of the Standardized Work deployment. It explains how to find and apply the best operational method that will lead to cost reductions, better product quality, and increased operator safety. Additional steps will be detailed in forthcoming books in the series.

Green Artists League GALvanizing Eco-Responsibility Subscribe via RSS HOME ABOUT ALCHEMICAL GARDEN ECOVENTIONS Help Cultivate The Alchemical Garden: An Edible Garden and Art Park at Newburyport's Rail Trail Posted by erin on April 25, 2011 3 comments The Alchemical Garden site February 2010 GAL is turning a desolate field of weeds into a visually compelling garden that will educate and engage the community for years to come. Located on a 160 x 25 site near the south entrance of Newburyport's Clipper City Rail Trail, the Alchemical Garden is a richly layered evolving art and horticulture experience that is accessible on many different levels to the public. Alchemical Garden Plot plan Alchemical Garden is designed to become a model for a sustainable, interactive public garden through the use of symbiotic, low maintenance plantings and recycled materials. The ancient discipline of Alchemy marries art and science and is famously known for transforming a common material into gold. The

Alchemical Garden will lead the community to transform on a number of levels : Alchemical Garden with Spring Wheat "Crop Circles" June, 2011 BUILD COMMUNITY: The Garden creates a gathering space for individuals to form a more intimate relationship with their community. The space is designed with visual features and seating areas to compel passers-by to pause, reflect, and have a multi-sensory interactive experience (sight, smell, touch, taste, smell) with the garden and the community.
